

N I G H T

— A STUDY FOR THE DIRECTOR

The Moon Turns the Room to Night.

나전칠기의 달

밤을 여는 방법

A small ceremony, held in an object.

사물 안에 담긴 작은 예식.

Most day/night toggles are engineering afterthoughts — a stock switch pushed into a settings tray. This work rejects that. The premise is that turning a room dark is a small, private ceremony, and that a well-made object should recognise the ceremony rather than dismiss it.

Our anchor is **나전칠기** — Korean lacquerware inlaid with iridescent slivers of mother-of-pearl. The lacquer field, hand-built from twenty-plus coats, drinks the light in the room; against it, the pearl reads as its own kind of moon. The toggle inherits that image directly.

The *same object* holds both states. In **Night**, the field is void lacquer and the pearl moon sits on the right shore. In **Day**, the field becomes a woven pearl sky with lilac cloud, and the moon crosses to the left as an amber-gold nacre sun. Between the two poses, the interaction breathes.

01 **Material, not motif.** The pearl is a photograph of a real surface. Never redraw it as gradient or SVG.

02 **Slow, then still.** Motion carries the ceremony (≥ 1 s). The resting states must be worth staring at.

03 **Gold is the seam.** The 1 px signal-gold rim is the only element shared between the two palettes; it stitches them together.

04 **One moon.** Never duplicate the pearl within a single composition. There is one moon.

DIRECTOR'S NOTE

"The moon is already inside the shell. Our job is to not get in its way."

COLORBLIND-SAFETY RULE · RETAINED FROM SOURCE

Every distinct meaning differs in ≥ 2 channels (hue + luminance). Void ↔ Pearl-core contrast is fixed at $\geq 15 : 1$ (AAA). No token is used for meaning by hue alone.

LUMINANCE LAW

A frame is only legal if it obeys the coverage ratios below. This is what keeps night from becoming grey and day from becoming pastel.

● Void family	$\geq 60\%$
● Midnight ramp band	$\leq 15\%$
● Pearl core white	$\leq 1\%$
● Moonlight ray	$\leq 6\%$ opac.
● Signal gold	rim only
● Alarm emerald	0% at rest

CONTRAST CONTRACT

Pearl on Void	15.8 : 1 · AAA
Gold on Void	9.2 : 1 · AAA
Moonlight on Void	7.4 : 1 · AAA
Ink on Sky Mint	13.4 : 1 · AAA

THE SEAM

Signal gold #FFCC6E is the *only* value present in both palettes. It appears exclusively as the 1–1.5 px rim, hairlines, and section captions. If gold is missing, the object is not part of this system.

TYPOGRAPHIC VOICES

DISPLAY

Marcellus

Latin epigraphic serif. 32–64 pt titles only.

The Moon
Turns the Room

BODY

Cormorant
Garamond

11–14 pt body. Italic for definition.

Against a lacquer field polished twenty times over, the pearl reads not as ornament but as its own kind of moon — a small, borrowed light laid into a much larger dark.

HANGUL COMPANION

나눔명조

Nanum Myeongjo. Serif Hangul + Latin caps.

ICONOGRAPHY — THE SHARD

clip-path:

```
polygon(  
  50% 0%, 88% 34%,  
  74% 100%, 20% 80%,  
  6% 30%  
)
```

One irregular pentagon at every scale — bullets, sparkle bursts, success glyphs. Fill is always a 4-stop nacre gradient; edge is a 1 px gold halo. Rotation is randomised; never orthogonal.

DESIGN TOKENS

```
--void #04050E  
--midnight #141A3C  
--depth #2A3560  
--moonlight #9FB8C8  
--pearl-core #F2F6FF  
--gold-seam #FFCC6E  
--sky-mint #5CF2E8  
--celadon #2ED6C4  
--lilac-cloud #8E5CF0  
--cloud-blush #E14FB8  
--alarm #0FF266
```

SCENE 1 · NIGHT · 밤

- Field is *void lacquer* (#04050E), never pure black.
- Pearl moon anchors the **right** third; ~72% of the pill height.
- Foreshore reads bottom-30% only. Never mid-height.
- 2–3 phantom stars max; ≤6% opacity Moonlight ray.
- Gold rim: 1.5 px, unbroken.

SCENE 2 · DAY · 낮

- Field is *pearl tesserae* — sky mint + celadon weave. Never a smooth wash.
- Sun anchors **left**. Warm amber nacre with visible fracture lines.
- Lilac cloud on right, edged with fine gold outline. No white 'cotton' clouds.
- Iridescent horizon in the lower third; never above mid-line.
- Gold rim: 1.5 px, unbroken. (Same seam.)

SHARED GEOMETRY

The two scenes share one pill and one disc size — **width : height = 2.4 : 1**, disc = **72%** of pill height. The disc's fill swaps material; everything else swaps *environment*. This is the entire toggle.

ENVIRONMENT RULES

- 01** Toggle never appears on white. Backdrop is void #04050E or paper #F2ECDD.
- 02** Minimum 96 px breathing room on all sides. Do not crop the pill.
- 03** Label sits ≥40 px below pill, centred, Nanum Myeongjo caps, +0.28 em.
- 04** Never place text *on* the pill except the DAY/NIGHT pill-labels (18 px Signal gold).

STATE MACHINE

COMPONENT ANATOMY

```
<NajeonToggle>  
  <Pill /> // track - pill-shaped clip  
  <FieldNight opacity={n} />  
  <FieldDay opacity={1-n} />  
  <Foreshore />  
  <Cloud />  
  <Disc x={n ? RIGHT : LEFT}>  
    <Pearl opacity={n} />  
    <AmberNacre opacity={1-n} />  
    <GoldRim />  
  </Disc>  
  <Label>{n ? '밤 · NIGHT' : '낮 · DAY'}</Label>
```

PROP SCHEMA

value	boolean · night = true
onChange	(next: boolean) ⇒ void
size	'sm' 'md' 'lg' · md=560
reducedMotion	auto force off
label	'ko' 'en' 'both'
soundOn	boolean · shell chime

ACCESSIBILITY CONTRACT

- **role="switch"**, focusable, **aria-checked** reflects state.
- Focus ring: 2 px outer signal-gold, 3 px offset. Never removed.
- Keyboard: **Space** · **Enter** toggle.
- **prefers-reduced-motion** → crossfade only (900 ms), no travel, no burst.
- Screen-reader label: *"Day/night mode. Currently night."* — never colour-only.
- Hit-area padding ≥ 44 × 44 px on smallest breakpoint.

PERSISTENCE

key: najeon.mode
value: "night" | "day"
fallback: prefers-color-scheme
SSR: pre-hydrate from cookie mirror

01

Anticipation

예감

Pointer down. Object lifts 2 px in 120 ms.
The room notices.

02

Traversal

건너감

Disc slides shore-to-shore. 1.00 s, weighted ease. Never linear.

03

Confirmation

확인

18 nacre shards burst from disc. Staggered ≤100 ms; 700–1220 ms each.

04

Residue

여운

Idle continues. Sheen 5.5 s loop, drift ±6 px 7 s, star twinkle.

TIMING DIAGRAM · 0 → 1.5 S

LAYER CROSSFADES — OVERLAP THE TRAVERSAL

Field crossfade	0.90 s ease
Disc material swap	0.90 s ease
Cloud fade in (day)	1.10 s ease-out
Foreshore stars fade	0.60 s ease-in
Label crossfade	0.60 s ease
Focus ring pulse	300 ms · 2× on toggle

UNIVERSAL RULES

- Nothing moves in a straight line. Every path is arc'd or eased.
- The moon is never pinned. Idle motion runs continuously.
- One burst per toggle. Sparkle is confirmation, not decoration.
- Never snap under 500 ms. The photograph deserves more time.
- No spring physics. This is a ceremony, not a UIKit.

REDUCED-MOTION FALLBACK

```
@media (prefers-reduced-motion) {  
  --traversal: 0 s;  
  --field-fade: 900 ms;  
  --burst: none;  
  --idle: none;  
}
```

IDLE LIFE · ALWAYS ON

The object continues to breathe under all state transitions — sheen sweep, disc drift, star twinkle. Do *not* pause idle animations during the traversal. The ceremony rides on top of a living object.
